Testing Facilities for Reasonable Suspicion and Post-Accident Testing

Reasonable suspicion and post-accident testing on commercial and non-commercial licenses may be conducted at Spearfish Regional Hospital Lab or Black Hills Urgent Care. The supervisor requesting the drug/alcohol test will need to contact the testing facility and provide directions for completion of both drug and alcohol testing. The testing facility will need to know if the employee is a commercial driver's license holder.

Follow the policies outlined in the City of Spearfish Drug and Alcohol Free Workplace Plan (Policy 10) and complete appropriate forms if testing is for reasonable suspicion.
